

KER JOSHUA MONTERO

Software Developer

SUMMARY

A motivated and enthusiastic Entry-Level Software Developer seeking an opportunity to utilize my technical skills and knowledge in software development and debugging. With excellent problem-solving and troubleshooting abilities, I am confident in my capacity to make a substantial contribution to the success of the company. My ultimate goal is to help the team achieve its goals by creating quality and reliable software solutions.

RELEVANT EXPERIENCE

Software Developer

Anderson Group BPO Inc., (2017-2018)

- I created and maintained the company's website and developed the following projects:"
 - **HROnline:** is a platform designed to showcase the services provided by the company. Through the development of this project, the company gains an expansive space for advertising
 - **Payroll:** is a system created to automate salary calculations for individuals, linked with Electronic LogBook to record employees' working hours.
 - **ElectronicLogBook:** is a system designed for employees to log their work hours by clocking in and out. It functions as a dedicated employee timekeeping tool, necessitating the use of the employee's username/employee number and PIN for clocking in.
 - **AndersonSurvey and AndersonForms:** To accommodate its use across various systems, I've developed separate systems for Anderson Survey and Anderson Forms, ensuring easy access whenever required. This setup allows individuals to submit reviews while also providing the company with readily accessible forms.
- Elevated to the role of project manager.
 - I oversaw a group of 42 software development interns
 - held weekly meetings with the CEO, HR, and department leaders to review progress and address requested changes for each system.
 - I conducted interviews with internship applicants.
